

Quick Start

SPENDING TRACKED. BUSINESS GROWN.

Private-pilot client guide · Published 2026-08-06 · Source f2f00e9b4828180ad1a5d109243e7be3a0f430cb

Private-pilot boundary. Capture Tracker organizes recorded financial facts. It is not a CPA; it does not file taxes, send payments, run payroll, invoice, manage inventory, or offer public self-service onboarding. Upload trusted files only: malware scanning and quarantine are not currently performed.

Start here

Sign in at the private URL supplied by the workspace owner. In an initialized production workspace, Create account is intentionally unavailable. There is no self-service password reset; contact the owner for access help.

Today

Use the read-only briefing for available business cash, tax planning, review work, documents, Weekly Review, and recent activity.

Money and Documents

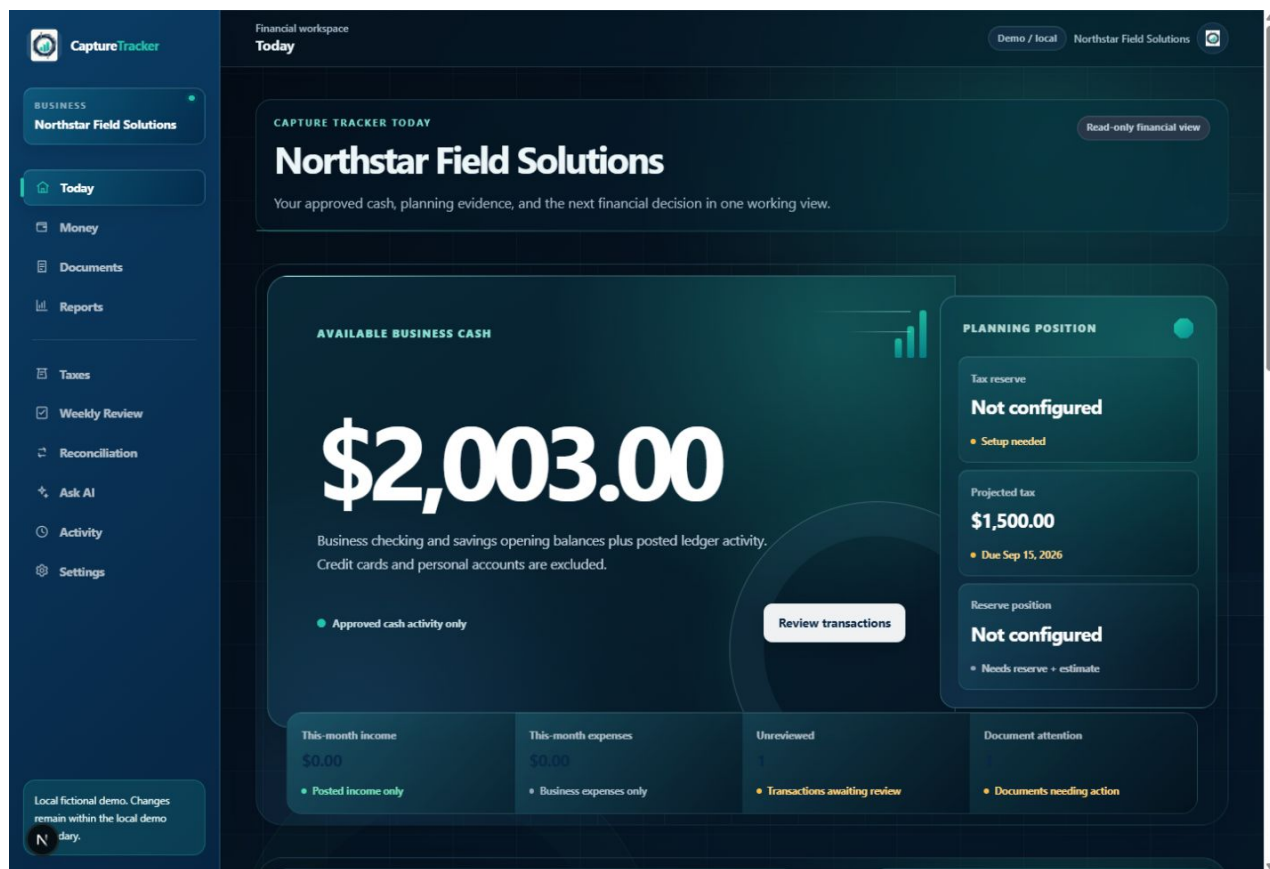

Money records balanced activity. Documents stores private evidence. Upload PDF, JPEG, or PNG up to 10 MiB; review extraction and matching suggestions before linking. Suggestions never change accounting automatically.

Reports

Profit and Loss, Balance Sheet, Trial Balance, and Cash Activity use complete database-backed totals. Supporting detail may paginate without reducing totals. CSV protects formula-like content and can safely refuse a large export.

Mobile and safety

Add the site to Home Screen as a browser shortcut, not an app. Allow the camera only for trusted receipts. Sign out on shared devices.

Local fictional demo capture; all business data is synthetic.
